LIBRARY

SOIL EROSION AND ITS PREVENTION

(A partial list of references, 1900 - 1934)

Compiled by Dorothy Graf, Librarian

Revised 1935

1900

Anonymous

Erosion due to heavy rains and steep grades. Monthly weather review. v.28. 1900. p.544.

Marr, J.E.

Scientific study of scenery. London, Methuen and co., 1900. 368p.

1901

Garrison, F. L.

Effects of deforestation in China. Forest leaves. v.8. 1901. p.75-78

1902

Anonymous

Influence of forests on water runoff. Forest leaves. v.8. 1902. p.167.

Water resources of the southern Appalachian mountains. Forestry and irrigation. v.8. 1902. p.335-340.

Davis, W. M.

River terraces in New England. Harvard university. Museum of comparative zoology. Bulletin. v. 38. 1902. p.279-346.

Forbes, R. H.

River irrigating water of Arizona, -their character and effects. Arizona. Agricultural experiment station. Bulletin no.44. 1902. 142-214p.

O'Reilly, J.P.

On the waste of the coast of Ireland as a factor on Irish history. Royal Irish Academy. Proceedings. v.24. 1902. p.95-202.

Rothrock, J. T.

Black willow (salix nigra, marsh.) as a protector of river banks. Pennsylvania. Department of forestry. Report, 1901-1902. 1902. p.136-137.

Wheeler, W.H.

Sea coast: 1. Destruction; 2.Littoral drift; 3.Protection. London, Longmans, Green and co., 1902. 36lp.

1903

Langille, H. D. and others.

Forest conditions in the Cascade range forest reserve, Oregon. U.S. Geological survey. Professional paper no.9. 1903. 298p.

Lippincott, J. B.

California hydrology. U.S. Geological survey. Water supply paper no.81. 1903. 488p.

Meier, F. R.

Most profitable trees to be planted on waste lands of New Jersey. New Jersey. State horticultural society. Annual report. no.28. 1903. p.208-215.

Rafter, G. W.

Relation of rainfall to run-off. U.S. Geological survey. Water supply paper no.80. 1903. 104p.

Toumey, J. W.

Relation of forests to streamflow. U.S. Department of agriculture. Yearbook. 1903. p.279-288.

- Anonymous. It is estimated that 3/4 of tillable area of country is affected, and unless preventive measures are immediately taken, this land will in time be worthless as the 17,000,000 acres of formerly good land that has been gullied and depleted to such an extent that its owners can not afford to reclaim it.

- Jones, G. D. Root bed that resists erosion. Farm implement news. v.55. March 29, 1934. p.20. Aerate soil to as great a depth as possible. Ripping should follow around contours or across slope, not with them, and should be every 24 to 30 inches apart and at depth of about 15 to 24 inches. Just before planting time, heavy duty or cover-crop disc should be used. Last operation is use of jostler to shake down finer or pulverized soil. With this type of soil structure, water run-off is reduced to minimum and water storage to maximum.
